OBJECTIVE

With the web becoming a powerful tool for businesses and people alike, the need exists for creatively designed and functional websites across multiple platforms. It is my goal to acquire a job where I can learn and build on my existing skills in web development, to create such websites.

EXPERIENCE

COUNSELING & PSYCHOTHERAPY CENTER INC., 2015 – present
IT Specialist

- Currently working on re-designing the company website to be visually appealing, mobile friendly, and responsive/adaptive.
- Update the company website's Careers page when new positions become available.
- Update an affiliate's website with important announcements, upcoming events, and new positions through Joomla.
- Designed the company's monthly newsletter, and responsible for putting it together.
- Troubleshoot various computer and hardware issues for employees in the Needham office as well as out of state offices through remote access using TeamViewer.
- With the role as SharePoint and Office 365 admin, performed account creation/deactivation, site creation/maintenance, and user permission access.

UMASS BOSTON, 2013
KDLab Research Assistant

- Developed and maintained a web-based processing service involving the detection of buildings via satellite images submitted by users.
- Developed a web client that rendered image maps of user submitted images using KML to highlight buildings in the image.

FREELANCE

CHUNG'S ASIAN CUISINE, 2015
www.chungsasiancuisine.com

- With the use of Bootstrap, re-designed the entire website for this family owned Chinese restaurant.

ACADEMIC PROJECTS

E-COMMERCE WEBSITE, 2014
CS 437: Database-backed Websites & Web Services

- Part of a team that developed an E-commerce website called TheTerrorByte.com that sells computer parts.
- Skill set used: HTML, CSS, Bootstrap, Ruby on Rails, Database Management
